

TITLE

CIS-PRENYLTRANSFERASES FROM PLANTS

ABSTRACT OF THE DISCLOSURE

This invention pertains to nucleic acid fragments encoding plant proteins that are
5 homologs to the *cis*-prenyltransferases UPP synthase from the bacterium *Micrococcus luteus*
or Dedol-PP synthase from yeast *Saccharomyces cerevisiae*. More specifically, this
invention pertains to *cis*-prenyltransferase homologs from wheat, grape, soybean, rice,
African daisy, rubber tree latex and pot marigold.
